Job Description/Essential Elements:
Under the supervision of ROP and High School administrations, the Engineering and Architectural Design Instructor provides rigorous and relevant instruction aligned to industry and state standards in order for all students to graduate with 21st Century college and career ready skills.

Essential Job Functions:
• Develop and implement innovative and engaging differentiated instruction using a project based learning model that includes key assignments and the overarching “Big Idea” culmination project aligned to the CTE Model Curriculum Standards and Common Core State Standards
• Collaborate with academic peers in a professional learning community to create and integrate cross-curricular activities to strengthen and deepen student’s knowledge of curricular content
• Identify and maintain professional business and industry networks to develop an employer advisory to guide curriculum development and promote work-based learning aligned to pathway content
• Cultivate and nurture a safe environment that promote social emotional learning and respect among diversity of all learners
• Analyze data using multiple assessments to guide instructional practice based on individualized, unique needs of each student
• Engage with parent and community partners to increase active involvement in student learning
• Monitor and maintain school reports including, but not limited to, attendance, assessments, grades
• Participate in school site professional development trainings and activities
• Perform other related duties as assigned

Requirements for Applying:
To be considered, a candidate must submit all of the following materials online at www.weteachla.com:
• Completed application and materials submitted online at www.weteachla.com
• Letter of Intent
• Copy of current resume with references
• Copy of valid California CTE teaching credential(s) OR eligibility to apply with CCTC

Email Notification to ROP Upon Online Application Submission:
• Send email to connie.legaspi@lausd.net with the following attachments:
  o California CTE teaching credential(s) if available
  o Resume reflecting eligibility to apply for CTE credential with CCTC
  o Resume reflecting Bachelor’s Degree
  o CBEST Passage if available

Minimum Qualifications:
• A valid California Designated Subjects Career Technical Education (CTE) Teaching Credential OR eligibility to obtain a credential based on three (3) years of verifiable work experience in the subject area; in lieu of three years, one year of verifiable work experience WITH the completion of a minimum of 48 semester units of postsecondary education in the related subject area.
• Possession of a valid California driver’s license
• Possession of a Bachelor’s degree
• Passage of CBEST and/or District Proficiency required (To be scheduled if not completed)
Desired Qualifications:

- Teaching experience in Engineering and Architectural Design Instructor or related occupations
