USGBC-LA
THE ELECTRIFIED CONSTRUCTION COALITION
USGBC-LA, in collaboration with the City of Los Angeles and local leaders throughout the real estate and construction industry, has formed a coalition to bring electrified construction equipment to the greater L.A. region. This includes increasing access to equipment as well as addressing cost, education, environmental quality, and infrastructure.

We recognize that electrified construction equipment has the potential to:

- Reduce construction site related greenhouse gas emissions
- Reduce operating and maintenance costs
- Reduce air pollution while improving air quality for workers and residents
- Reduce noise pollution for workers and residents

Today there is little knowledge of infrastructure in place to support onsite implementation and use of this equipment in the U.S. As a result, the availability of equipment is also highly limited.

Together we strive to increase awareness and access to these solutions to make clean construction a reality, position L.A. as a global leader on this issue, and change the narrative of dirty, polluting construction sites in our cities.

We are seeking partners to demonstrate local potential by providing access to discounted or rental equipment as well as pilot construction sites, charging infrastructure, and more to support electrified construction in Southern California. We will actively bring together partners, help develop pilot projects, and promote available equipment to demonstrate:

- **Heavy Duty Equipment**
  - Cranes, Excavators, Rollers, Drilling Rigs
- **Medium Duty Equipment**
  - Cement Mixers, Loaders, Backhoes, Dumpers, Lifts
- **Light Duty Equipment**
  - Forklifts, Lighting, Generators, Rammers, Tools
- **Charging Infrastructure**
  - Renewables, Energy Storage, Charging

Join or sponsor the Coalition today!
This is a rare opportunity to be part of a group of leaders defining the future of construction and your participation will result in:

- Case studies & speaking opportunities
- Learning-through-experience for you and your team
- Exclusive access at discounted costs to innovative electrified construction equipment
- Reduction of construction site emissions, air & and noise pollution, and operating costs
- Participation in press releases and other media

**Our Coalition Partners Include:** The USGBC-LA Construction Committee, the City of LA, the LA Department of Water and Power, Southern California Edison, Hathaway Dinwiddie Construction, Suffolk Construction, Lendlease, Howard Building Corporation, BNBuilders, CalPortland, and more.

Please contact **Ben Stapleton, Executive Director, USGBC-LA** at ben@usgbc-la.org for more information and help bring clean construction home today!
